

IRB Pre-Screening Review Form: MSN-ST: Population Health Track

Step 1: Determination of Whether the Project is "Research" as Defined by the IRB

1. Is your project intended to generate new knowledge that will be or is desired to be applied beyond the setting(s) at which the project is conducted?
 Yes No
2. Is your project designed to expand theory or inform policy that goes beyond the project setting(s)?
 Yes No
3. Will your project implement an intervention that has not been published as being used/ tested in your population of interest?
 Yes No
4. Will your project implement an intervention using a protocol that deviates *substantively* from how the protocol has been used previously?
 Yes No
5. Will the project replicate or extend a previous research study?
 Yes No

Step 2: Determination of Whether the Project includes Human Subjects

6. Will your project involve collecting, using, studying, analyzing, or generating data, information, or biospecimens by interacting with or intervening with living humans?

Yes No

7. Will your project involve collecting, generating, using, studying, or analyzing identifiable* private** information, identifiable biospecimens, and/or protected health information?

*Data, information, or biospecimens for which the identity of the subject is or may be readily ascertained (e.g. through codes or other types of alternative identifiers) by the investigator or associated with the information or biospecimens.

**Data, Information, or biospecimens that occurs or are collected in a context in which the individual can reasonably expect that no observation or recording is taking place or will not be made public, and for which the identity of the subject is or may be readily ascertained by the investigator or associated with the information or biospecimens.

Yes No

If you answered “Yes” to any of questions #1 through #5 in Step 1 and any question in Step 2, then your project is congruent with Chamberlain’s definition of human subjects research and you must submit the full IRB application packet for IRB review and approval.

Step 3: Additional Information

8. Does the practice setting require that this project be reviewed by the setting’s IRB or other review committee?

Yes No

9. Does the project involve interacting directly with or having a direct impact on any of the following populations? (Identification of a vulnerable population does not always require the project to go to the IRB for a complete review).

Yes No Persons below the age of 18 years

Yes No Persons with cognitive impairment

Yes No Prisoners

Yes No Pregnant women, human fetuses, or neonates

Yes No Persons institutionalized

10. Will Chamberlain students, faculty, or staff be the subjects of the proposed project?

Yes No

What are your population-focused nursing diagnosis, project goal, and objectives?

11. Enter your population-focused nursing diagnosis in the space provided below. Include the goal and objectives from the MSN Project Plan Template along with the name of the practicum site. When you submit the IRB Prescreening form, you will also submit your completed MSN Project Plan Template in order to provide the full details of your project plan.

Student Name (Printed) _____

Student Signature _____ Date _____

I have reviewed the student's practice question and attest to the accuracy of the responses to the prescreening criteria questions. All elements of the practice question are present.

Faculty Signature _____ Title _____ Date _____
